The effects of lithiation process on the performance of all-solid-state electrochromic devices

Özlem Duyar Coşkun, Gamze Atak

PII: S0040-6090(18)30484-X
DOI: [doi:10.1016/j.tsf.2018.07.019](https://doi.org/10.1016/j.tsf.2018.07.019)
Reference: TSF 36776
To appear in: *Thin Solid Films*
Received date: 20 November 2017
Revised date: 6 July 2018
Accepted date: 13 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The effects of lithiation process on the performance of all-solid-state
electrochromic devices**

Özlem Duyar Coşkun^{a*}, Gamze Atak^b
