This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Removing barriers to sustainability research on personal fabrication and social manufacturing

Highlights

- Unclear terminology and lack of frameworks hamper sustainability research.
- Social manufacturing is an integrating framework for distributed production.
- Individual participation is moving from service innovation to manufacturing.
- Social manufacturing can have considerable sustainability outcomes.
