Experimental study of sodium chloride aqueous solution effect on the kinetic parameters of carbon dioxide hydrate formation in the presence/absence of magnetic field

Hossein Moeini, Mohammad Bonyadi, Feridun Esmailzadeh, Ali Rasoolzadeh

PII: S1875-5100(17)30482-1

DOI: [10.1016/j.jngse.2017.12.012](https://doi.org/10.1016/j.jngse.2017.12.012)

Reference: JNGSE 2387

To appear in: *Journal of Natural Gas Science and Engineering*

Received Date: 15 May 2017

Revised Date: 26 October 2017

Accepted Date: 16 December 2017

Please cite this article as: Moeini, H., Bonyadi, M., Esmailzadeh, F., Rasoolzadeh, A., Experimental study of sodium chloride aqueous solution effect on the kinetic parameters of carbon dioxide hydrate formation in the presence/absence of magnetic field, *Journal of Natural Gas Science & Engineering* (2018), doi: 10.1016/j.jngse.2017.12.012.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydrate Structures Formed in the
Presence of NaCl and Pure Water

Pure Water (Hard and Dense)

Sodium Chloride Solution (Soft
& Porous)
