Estimating rock cooling rates by using multiple luminescence thermochronometers

Jintang Qin, Jie Chen, Pierre G. Valla, Frédéric Herman, Kechang Li

PII: S1350-4487(15)30025-1

DOI: [10.1016/j.radmeas.2015.05.002](https://doi.org/10.1016/j.radmeas.2015.05.002)

Reference: RM 5420

To appear in: *Radiation Measurements*

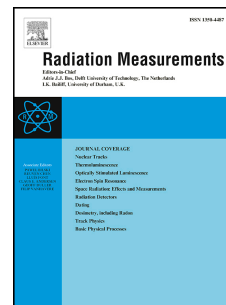

Received Date: 15 October 2014

Revised Date: 5 April 2015

Accepted Date: 10 May 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Estimating rock cooling rates by using multiple luminescence thermochronometers
