This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Protein-restriction diet during the suckling phase programs rat metabolism
against obesity and insulin resistance exacerbation induced by a high-fat diet in
adulthood**

Running title: Early low protein diet attenuates adult obesity

Keywords: protein restriction, lactation, obesity, metabolic programming.
