Variation in microbial community structure correlates with heavy-metal contamination in soils decades after mining ceased

Rachelle E. Beattie, Wyatt Henke, Maria F. Campa, Terry C. Hazen, L. Rex McAliley, James H. Campbell

PII: S0038-0717(18)30264-5

DOI: [10.1016/j.soilbio.2018.08.011](https://doi.org/10.1016/j.soilbio.2018.08.011)

Reference: SBB 7249

To appear in: *Soil Biology and Biochemistry*

Received Date: 6 May 2018

Revised Date: 10 August 2018

Accepted Date: 12 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Variation in microbial community structure correlates with heavy-metal contamination in soils
2 decades after mining ceased
