This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

Effect of pulsed electric fields on the production of yeast extract by autolysis

Authors and affiliations:

Georgios Dimopoulos¹, Nefeli Stefanou², Varvara Andreou¹, Petros Taoukis¹

¹School of Chemical Engineering, National Technical University of Athens, Greece

²Department of Biological Applications and Technologies, University of Ioannina, Greece

Corresponding author:

Petros Taoukis (taoukis@chemeng.ntua.gr)

Keywords:

PEF, yeast, autolysis, yeast extract
