Protein-anchoring therapy to target extracellular matrix proteins to their physiological destinations

Mikako Ito, Kinji Ohno

PII: S0945-053X(17)30422-5  
DOI: [doi:10.1016/j.matbio.2018.02.014](https://doi.org/10.1016/j.matbio.2018.02.014)  
Reference: MATBIO 1439

To appear in:

Received date: 22 November 2017  
Revised date: 15 February 2018  
Accepted date: 16 February 2018

Please check if appropriate. *Matbio*(2017), doi:[10.1016/j.matbio.2018.02.014](https://doi.org/10.1016/j.matbio.2018.02.014)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Protein-anchoring therapy to target extracellular matrix proteins to their physiological destinations**

**Keywords:**

protein-anchoring therapy, neuromuscular junction, endplate acetylcholinesterase deficiency, collagen Q, Duchenne muscular dystrophy, biglycan

**Abbreviations used:**

CMS, congenital myasthenic syndromes

ECM, extracellular matrix

NMJ, neuromuscular junction

AChE, acetylcholinesterase

AAV, adeno-associated virus

DMD, Duchenne muscular dystrophy
