This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Leu and/or Phe infusion can improve the expression and secretion of pancreatic amylase
- Leu and/or Phe infusion increased the intestinal starch digestion in goats
- The regulation of the pancreatic amylase expression mainly occurs at the transcriptional and/or translational level
