This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Targeting an oncogenic kinase/phosphatase signaling network for cancer therapy

Xiao-Mei Qi ^a, Fang Wang ^a, Matthew Mortensen ^a, Ryan Wertz ^a and Guan Chen ^{a,b}

^a Department of Pharmacology and Toxicology, ^b Zablocki Veterans Affairs Medical Center, Medical College of Wisconsin, Milwaukee, USA,

Corresponds to gchen@mcw.edu

Key words: kinase/phosphatase signaling network; PDZ-coupled protein-protein complex; phosphorylation and dephosphorylation; cancer development and progression; targeted cancer therapy.
