Involvement of nociceptive transient receptor potential channels in repellent action of pulegone

Azusa Majikina, Kenji Takahashi, Shigeru Saito, Makoto Tominaga, Toshio Ohta

PII: S0006-2952(18)30089-3
DOI: <https://doi.org/10.1016/j.bcp.2018.02.032>
Reference: BCP 13077

To appear in: *Biochemical Pharmacology*

Received Date: 23 January 2018
Accepted Date: 26 February 2018

Please cite this article as: A. Majikina, K. Takahashi, S. Saito, M. Tominaga, T. Ohta, Involvement of nociceptive transient receptor potential channels in repellent action of pulegone, *Biochemical Pharmacology* (2018), doi: <https://doi.org/10.1016/j.bcp.2018.02.032>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ms. No. BCP-D-18-00075

**Involvement of nociceptive transient receptor potential channels
in repellent action of pulegone**

Azusa Majikina¹, Kenji Takahashi¹, Shigeru Saito², Makoto Tominaga² and Toshio Ohta^{1*}

¹Department of Veterinary Pharmacology, Faculty of Agriculture, Tottori University, Tottori, Japan, ²Division of Cell Signaling, Okazaki Institute for Integrative Bioscience (National Institute for Physiological Sciences), National Institutes of Natural Sciences, Okazaki, Japan

Running head: Repellent effect on nociceptive TRP channels.

Key words: intracellular Ca²⁺ increase; ion channels; repellent; sensory neuron; TRP channel.
