Lung development, regeneration and plasticity: From disease physiopathology to drug design using induced pluripotent stem cells

Engi Ahmed, Caroline Sansac, Said Assou, Delphine Gras, Aurélie Petit, Isabelle Vachier, Pascal Chanez, John De Vos, Arnaud Bourdin

PII: S0163-7258(17)30239-5
DOI: doi:[10.1016/j.pharmthera.2017.10.002](https://doi.org/10.1016/j.pharmthera.2017.10.002)
Reference: JPT 7130

To appear in: *Pharmacology and Therapeutics*

Please cite this article as: Ahmed, E., Sansac, C., Assou, S., Gras, D., Petit, A., Vachier, I., Chanez, P., De Vos, J. & Bourdin, A., Lung development, regeneration and plasticity: From disease physiopathology to drug design using induced pluripotent stem cells, *Pharmacology and Therapeutics* (2017), doi:[10.1016/j.pharmthera.2017.10.002](https://doi.org/10.1016/j.pharmthera.2017.10.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
