This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pro - Factor Concentrates are Essential for Hemostasis in Complex Cardiac Surgery

1. Author: Kamrouz Ghadimi, MD

- Title: Assistant Professor of Anesthesiology & Critical Care
- Affiliation: Divisions of Cardiothoracic Anesthesiology & Critical Care Medicine, Duke University Medical Center, Durham, North Carolina
- Email: kamrouz.ghadimi@duke.edu
- Contribution: This author helped perform the literature search and prepare the manuscript
- Attestation: This author approved the final manuscript
- Conflicts of Interest: Site PI for the Phase III, Randomized, Double-blind, Multicenter comparative study of Octaplex®, a 4-factor Prothrombin Complex Concentrate, and Kcentra® for the reversal of Vitamin K Antagonist-induced anticoagulation in patients needing urgent surgery with significant bleeding risk, sponsored by Octapharma; Site Sub-Investigator in a prospective, open-label study of Andexanet-Alfa in patients receiving Factor Xa inhibitors with acute major bleeding, sponsored by Portola Pharmaceuticals.

2. Author: Ian J. Welsby, MB BS, FRCA

- Title: Associate Professor of Anesthesiology & Critical Care
- Affiliation: Divisions of Cardiothoracic Anesthesiology & Critical Care Medicine, Duke University Medical Center, Durham, North Carolina
- Email: ian.welsby@duke.edu
- Contribution: This author helped perform the literature search and prepare the manuscript
- Attestation: This author approved the final manuscript
