E-mail address: afa9911@sina.com (Chen Fang), panyang129@126.com (Yang Pan)

Yun Huang and Si-Cheng Li contributed equally to this work

Authors' contributions:

Huang and Li were responsible for the conception and design of the study and drafting the article. Pei and Wang performed the data analysis and interpretation of data. All authors participated in interpretation of the findings. Hu and Zhang revised it critically for important intellectual content. Guo and Ruan were responsible for acquisition of data. Pan and Fang were responsible for final approval of the version to be submitted.

Disclosure of interest

The authors declare that they have no conflict of interest.

Novelty statement

This study showed that T1D in Han Chinese is associated with gut microbial imbalance, which might help identify bacterial species and pathways that can be modified to prevent or treat T1D.
