This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE PAGE

Title: Glycosylated Hemoglobin Level May Predict The Severity Of Gastroparesis In Diabetic Patients

Short title: Glycemic Control Association With Gastroparesis

Authors:

1. Manhal Izzy, MD¹ (*study concept and design; acquisition of data; interpretation of data; drafting of manuscript; study supervision*)
2. Mindy Lee, MD¹ (*acquisition of data; drafting of manuscript*)
3. Krysta Johns-Harris, MD¹ (*acquisition of data; drafting of manuscript*)
4. Faraj Kargoli, MD, MPH¹ (*study design, analysis and interpretation of data; statistical analysis; drafting the manuscript*).
5. Steven Beckoff, MD¹ (*acquisition of data*)
6. Kwang Chun, MD² (*acquisition of data*)
7. Aaron Tokayer, MD, MPH¹ (*study concept and design; analysis and interpretation of data; drafting of manuscript; critical revision of manuscript for important intellectual content; study supervision; study guarantor*)

Departments and Institutions where work was done:

1. Division of Gastroenterology and Liver Diseases

Montefiore Medical Center

The Albert Einstein College of Medicine

Bronx, NY
