This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

L-theanine and caffeine improve target-specific attention to visual stimuli by decreasing mind wandering: a human functional magnetic resonance imaging study

Author Names

Chanaka N. Kahathuduwa ^{1,2,3}, Chathurika S. Dhanasekara ¹, Shao-Hua Chin ¹, Tyler Davis ^{3,4},
Vajira S. Weerasinghe ², Tharaka L. Dassanayake ^{2,5}, Martin Binks ¹

Author Affiliations

¹ Behavioral Medicine and Translational Research Lab, Department of Nutritional Sciences, Texas Tech University, Lubbock, Texas, USA.

² Department of Physiology, Faculty of Medicine, University of Peradeniya, Sri Lanka.

³ Department of Human Development and Family Studies, Texas Tech University, Lubbock, Texas, USA.

⁴ Department of Psychological Sciences, Texas Tech University, Lubbock, Texas, USA.

⁵ School of Psychology, The University of Newcastle, New South Wales, Australia.

Corresponding Author

Dr. Martin Binks, PhD, FTOS, FESPM

Associate Professor, Department of Nutritional Sciences, College of Human Sciences, Texas, Tech University, 1301 Akron Street, Box 1270, Lubbock, Texas 79409-1270, USA.
