This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Outcome of Catheter Ablation for Ventricular Tachycardia in Patients with Ischemic Cardiomyopathy: A Systematic Review and Meta-analysis of Randomized Clinical Trials

Waddah Maskoun MD, FACC, FHRS,^a Marwan Saad MD, PhD,^b Amjad Abualsuod MD,^b Ramez Nairooz MD,^c and John M Miller MD, FACC, FHRS.^d

^b Division of Cardiovascular Medicine, University of Arkansas for Medical Sciences, Little Rock, AR.

^c Division of Cardiovascular Medicine, University of Southern California, Los Angeles, CA.

^d Division of Cardiovascular Medicine, Indiana University Health, Indianapolis, IN.

Running title: VT ablation in ICM

Word count: 3,195 (excluding title page, abstract, author contributions, references, table and figure legends)

Disclosures: Dr. Maskoun has received research grant from Medtronic. Dr. Miller has received fellow training grants from Medtronic, Boston Scientific, and Biosense-Webster; speaking honoraria from Medtronic, Boston Scientific, Biosense-Webster, St. Jude Medical, and Biotronik; and is a scientific advisor (without compensation) for Topera. All other authors have reported that they have no relationships relevant to the contents of this paper to disclose.

Funding: None
