

Accepted Manuscript

Soluble Interleukin-7 receptor levels and risk of acute graft-versus-disease after allogeneic haematopoietic stem cell transplantation

Katrine Kielsen, Zaiba Shamim, Stephanie Thiant, Sylvie Faucher, Wendy Decker, Ib Jarle Christensen, Lars Peter Ryder, Ibrahim Yakoub-Agha, Klaus Müller

PII: S1521-6616(17)30145-6
DOI: doi: [10.1016/j.clim.2017.08.015](https://doi.org/10.1016/j.clim.2017.08.015)
Reference: YCLIM 7917

To appear in: *Clinical Immunology*

Received date: 1 March 2017
Revised date: 10 July 2017
Accepted date: 28 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
