Table of Contents

1. Executive Summary
2. Introduction
3. Background
4. The Challenge
5. Implementation
 - Prevention – Reducing harmful impact of future diseases
 - Profiling – Opportunities to be seized
 - Therapeutics – Matching conditions with treatments
6. Innovation changing the context
7. Interfacing with public policymaking
8. Who is to do what
9. Conclusion

- Investments, in education across all stakeholder groups, and in access – to testing and to therapies
- Policy priorities include the development of genomic profiling (particularly through its Million European Genomes Alliance),
- Incentives to drive wider and earlier access to diagnosis and the necessary engagement among all stakeholders, and conducive regulatory frameworks
- Ensuring that personalised health does not become the preserve of elites: systems must be found to ensure that innovation is rewarded but that there is wide and equal access to the fruits of innovation, while the overall costs are contained

1. EXECUTIVE SUMMARY

A massive improvement in the health of Europe's citizens is within reach. Scientists, technologists,
