Summary	107 words
Text	1923
Figures	3
References	18

**Key words:** Growth, feeding guides, oesophageal atresia, congenital diaphragmatic hernia

### Educational Aims

The reader will come to appreciate that:

- Feeding is often compromised in repaired oesophageal atresia and diaphragmatic hernia during early childhood
- Normal growth outcomes should be expected in the majority of infants
- Written information sheets for parents may reinforce nutritional strategies for parents to implement in their children.
