Type of article: Letter to the editor

Total number of pages:2

Total number of photographs:0

Total number of table:1

Source(s) of support: None

Conflicts of interest: No

Word count: 310 (without references)

**Abstract:** Using kappa is one of the common mistakes in reproducibility analysis for qualitative outcomes. Therefore, the use of such analysis may lead us to incorrect conclusions and cannot avoid misinterpretation.

**Keywords:** Breast lesion; Elasticity score; Elastography; Ultrasound; methodological issue
