A Sub-Type of Familial Pancreatic Cancer: Evidence and Implications of Loss of Function Polymorphisms and Indoleamine-2,3-Dioxygenase-2

Avinoam Nevler, MD, Alexander J. Muller, PhD, Joseph A. Cozzitorto, BA, Austin Goetz, MD, Jordan M. Winter, MD FACS, Theresa P. Yeo, PhD MPH MSN, Harish Lavu, MD FACS, Charles J. Yeo, MD FACS, George C. Prendergast, PhD, Jonathan R. Brody, PhD

PII: S1072-7515(18)30062-0

DOI: [10.1016/j.jamcollsurg.2017.12.052](https://doi.org/10.1016/j.jamcollsurg.2017.12.052)

Reference: ACS 9014

To appear in: *Journal of the American College of Surgeons*

Received Date: 18 December 2017

Accepted Date: 19 December 2017

Please cite this article as: Nevler A, Muller AJ, Cozzitorto JA, Goetz A, Winter JM, Yeo TP, Lavu H, Yeo CJ, Prendergast GC, Brody JR, A Sub-Type of Familial Pancreatic Cancer: Evidence and Implications of Loss of Function Polymorphisms and Indoleamine-2,3-Dioxygenase-2, *Journal of the American College of Surgeons* (2018), doi: 10.1016/j.jamcollsurg.2017.12.052.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
