

# Accepted Manuscript

Potential air quality benefits from increased solar photovoltaic electricity generation in the Eastern United States

Abel David, Tracey Holloway, Monica Harkey, Arber Rrushaj, Greg Brinkman, Phillip Duran, Mark Janssen, Paul Denholm

PII: S1352-2310(17)30810-5

DOI: [10.1016/j.atmosenv.2017.11.049](https://doi.org/10.1016/j.atmosenv.2017.11.049)

Reference: AEA 15706

To appear in: *Atmospheric Environment*

Received Date: 10 August 2017

Revised Date: 9 November 2017

Accepted Date: 27 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
