Effect of aromatic repolymerization of humic acid-like fraction on digestate phytotoxicity reduction during high-solid anaerobic digestion for stabilization treatment of sewage sludge

Yanfei Tang, Xiaowei Li, Bin Dong, Junjie Huang, Yanhong Wei, Xiaohu Dai, Lingling Dai

PII: S0043-1354(18)30535-9

DOI: [10.1016/j.watres.2018.07.003](https://doi.org/10.1016/j.watres.2018.07.003)

Reference: WR 13902

To appear in: *Water Research*

Received Date: 25 March 2018

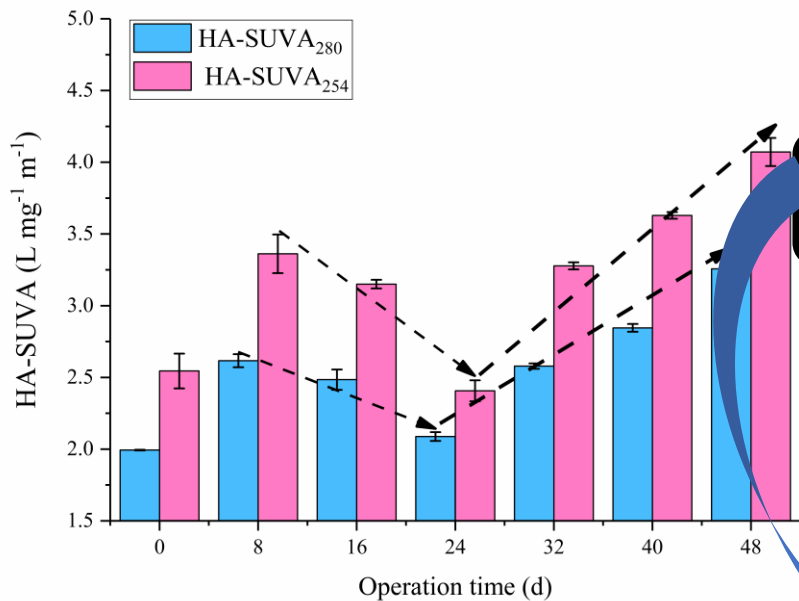

Revised Date: 5 June 2018

Accepted Date: 2 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Aromatic repolymerization**

**Positive correlation**

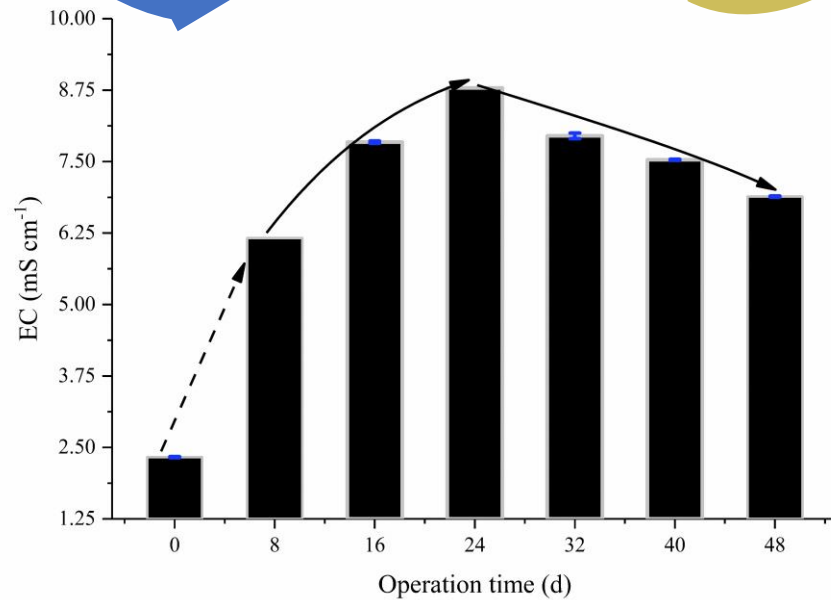

**Phytotoxicity reduction**

The high-solid AD stabilization

**Salinity rebound**

**Negative correlation**

**Negative correlation**
