Title: Growth stress response to sea level rise in species with contrasting functional traits: A case study in tidal freshwater forested wetlands

Authors: Lu Zhai, Ken W. Krauss, Xin Liu, Jamie A. Duberstein, William H. Conner, Donald L. DeAngelis, Leonel da Silveira Lobo Sternberg

PII: S0098-8472(18)30979-1
DOI: <https://doi.org/10.1016/j.envexpbot.2018.07.023>
Reference: EEB 3519

To appear in: *Environmental and Experimental Botany*

Received date: 27-6-2018
Revised date: 27-7-2018
Accepted date: 27-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Growth stress response to sea level rise in species with contrasting functional traits: A case study in tidal freshwater forested wetlands
