Shrinkage and porosity evolution during air-drying of non-cellular food systems: Experimental data versus mathematical modelling

Thanh Khuong Nguyen, Seddik Khalloufi, Martin Mondor, Cristina Ratti

PII: S0963-9969(17)30698-1
DOI: doi:[10.1016/j.foodres.2017.10.013](https://doi.org/10.1016/j.foodres.2017.10.013)
Reference: FRIN 7061
To appear in: *Food Research International*
Received date: 20 March 2017
Revised date: 6 October 2017
Accepted date: 9 October 2017

Please check if appropriate. *Food Research International* (2017), doi:[10.1016/j.foodres.2017.10.013](https://doi.org/10.1016/j.foodres.2017.10.013)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

SHRINKAGE AND POROSITY EVOLUTION DURING AIR-DRYING OF NON-CELLULAR FOOD SYSTEMS: EXPERIMENTAL DATA VERSUS MATHEMATICAL MODELLING

Thanh Khuong NGUYEN^{1,4,5}, Seddik KHALLOUFI², Martin MONDOR^{1,3} and Cristina RATTI^{1,2}
