Solubilization of industrial grade plant protein by enzymatic hydrolysis monitored by vibrational and nuclear magnetic resonance spectroscopy: A feasibility study

Marta Bevilacqua, Giulia Praticò, Johanne Plesner, Maja Molloy, Thomas Skov, Flemming H. Larsen

PII: S0963-9969(17)30654-3
DOI: doi:[10.1016/j.foodres.2017.09.069](https://doi.org/10.1016/j.foodres.2017.09.069)
Reference: FRIN 7018
To appear in: *Food Research International*
Received date: 21 July 2017
Revised date: 20 September 2017
Accepted date: 25 September 2017

Please check if appropriate. *Food Research International* (2017), doi:[10.1016/j.foodres.2017.09.069](https://doi.org/10.1016/j.foodres.2017.09.069)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Solubilization of industrial grade plant protein by enzymatic hydrolysis monitored by vibrational and nuclear magnetic resonance spectroscopy: a feasibility study
