Addressing the incorrect usage of wavelet-based hydrological and water resources forecasting models for real-world applications with best practices and a new forecasting framework

John Quilty, Jan Adamowski

PII: S0022-1694(18)30331-7
DOI: <https://doi.org/10.1016/j.jhydrol.2018.05.003>
Reference: HYDROL 22780

To appear in: *Journal of Hydrology*

Received Date: 9 February 2018
Revised Date: 7 April 2018
Accepted Date: 3 May 2018

Please cite this article as: Quilty, J., Adamowski, J., Addressing the incorrect usage of wavelet-based hydrological and water resources forecasting models for real-world applications with best practices and a new forecasting framework, *Journal of Hydrology* (2018), doi: <https://doi.org/10.1016/j.jhydrol.2018.05.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Addressing the incorrect usage of wavelet-based hydrological and water resources forecasting models for real-world applications with best practices and a new forecasting framework

John Quilty^{1#} and Jan Adamowski¹
