Connections among soil, ground, and surface water chemistries characterize nitrogen loss from an agricultural landscape in the upper Missouri River basin

W. Adam Sigler, Stephanie A. Ewing, Clain A. Jones, Robert A. Payn, E.N. Jack Brookshire, Jane K. Klassen, Douglas Jackson-Smith, Gary S. Weissmann

PII: S0022-1694(17)30683-2  
DOI: <https://doi.org/10.1016/j.jhydrol.2017.10.018>  
Reference: HYDROL 22298

To appear in: *Journal of Hydrology*

Received Date: 22 February 2017  
Revised Date: 22 June 2017  
Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
