Bedrock mega-grooves in glaciated terrain: A review

Mihaela Newton, David J.A. Evans, David H. Roberts, Chris R. Stokes

PII: S0012-8252(17)30138-1
DOI: [doi:10.1016/j.earscirev.2018.03.007](https://doi.org/10.1016/j.earscirev.2018.03.007)
Reference: EARTH 2604
To appear in: *Earth-Science Reviews*
Received date: 14 March 2017
Revised date: 13 March 2018
Accepted date: 14 March 2018

Please cite this article as: Mihaela Newton, David J.A. Evans, David H. Roberts, Chris R. Stokes , Bedrock mega-grooves in glaciated terrain: A review. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Earth(2018), doi:[10.1016/j.earscirev.2018.03.007](https://doi.org/10.1016/j.earscirev.2018.03.007)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bedrock mega-grooves in glaciated terrain: a review

Mihaela Newton*, David J.A. Evans, David H. Roberts, Chris R. Stokes
