Effect of water content and density on strength and deformation behavior of clay soils

John P. Malizia, Abdul Shakoor

PII: S0013-7952(17)31200-0
DOI: doi:[10.1016/j.enggeo.2018.07.028](https://doi.org/10.1016/j.enggeo.2018.07.028)
Reference: ENGEO 4907
To appear in: *Engineering Geology*
Received date: 17 August 2017
Revised date: 10 July 2018
Accepted date: 30 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of water content and density on strength and deformation behavior of clay soils
