This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A calorimetric test of adsorbent-coated fins

Mohamad A. AHAMAT¹, Michael J. TIERNEY^{2*},

¹ Universiti Kuala Lumpur, 1016, Jalan Sultan Ismail, 50250 Kuala Lumpur, Malaysia

²Department of Mechanical Engineering, University of Bristol, Bristol BS1 1TR, UK

Highlights

- Calorimetric assessment of adsorption rates has been attempted on finned adsorbents.
- The method detects differences in adsorption rate between different substrates: flat plates, aluminium and steel fins.
- The results have implications for the performance enhancement of adsorption heat pumps.
