This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Microplastic abundance and characteristics in French Atlantic coastal sediments using a new extraction method

Sampling strategy

Intertidal sediment
3 sites / 2 seasons

Rapid, simple and cheap protocol

Drying

Centrifugation

Filtration

Results

Characterization
(nature, size, form, color)

Quantification
