Information Extraction from Historical Handwritten Document Images
with a Context-aware Neural Model

J. Ignacio Toledo, Manuel Carbonell, Alicia Fornés, Josep Lladós

PII: S0031-3203(18)30314-5
DOI: <https://doi.org/10.1016/j.patcog.2018.08.020>
Reference: PR 6649

To appear in: *Pattern Recognition*

Received date: 8 January 2018
Revised date: 24 June 2018
Accepted date: 27 August 2018

Please cite this article as: J. Ignacio Toledo, Manuel Carbonell, Alicia Fornés, Josep Lladós, Information Extraction from Historical Handwritten Document Images with a Context-aware Neural Model, *Pattern Recognition* (2018), doi: <https://doi.org/10.1016/j.patcog.2018.08.020>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Two methods to extract information from structured handwritten document images.
- They are lexicon free, work at image level without any intermediate transcription.
- They model the structure of information elements by analyzing the words relations.
- Validation using a public dataset, outperforming the state of the art.
