**Abstract.** We investigate the consequences of public disclosure of information from company income tax returns filed in Australia. Supporters of more disclosure argue that increased transparency will improve tax compliance, while opponents argue that it will divulge sensitive information that is, in many cases, misunderstood. Our results show that in Australia large private companies experienced some consumer backlash and, perhaps partly in anticipation, some acted to avoid disclosure. We detect a small increase (decrease) in tax payments for private (public) firms subject to disclosure suggesting differential costs of disclosure across firms. Finally, we find that investors react negatively to anticipated and actual disclosure of tax information, most likely due to anticipated policy backlash rather than consumer backlash or the revelation of negative information about cash flows. These findings are important for both managers and policy makers, as the trend towards increased tax disclosure continues to rise globally.

We thank the Office of Tax Policy Research at the University of Michigan and the Tuck School of Business for financial support to administer our survey through TurkPrime and to purchase YouGov data for our analyses of consumer sentiment in Australia. We also thank the Australian Taxation Office (ATO) for providing anonymous and aggregated tax data that enabled some of the analysis contained within this report to be undertaken; the views expressed here are those of the authors, and not necessarily the ATO. We thank Lillian Chen for help with administering the TurkPrime survey and thank, for helpful comments: Malcolm Allen, Dirk Black, Jeremy Hirschhorn, Maximilian Müller (discussant), Tom Neubig, Adam Olson, Terry Shevlin, John Treu and Brian Williams (discussant) as well as participants in workshops at the University of California at Los Angeles, the University of Pennsylvania Law School, the University of Pennsylvania Wharton School, the University of Wisconsin, and participants at the 2016 BYU Accounting Symposium, 2016 NTA Meetings, 2017 Dartmouth Accounting Research Mini Conference, 2017 Berlin-Vallendar Conference on Tax Research, 2017 EIASM Conference on Current Research in Taxation, 2016 Duke/UNC Fall Camp, and the 2016 MaTax Conference.
