Graphical abstract

Highlights

- Tree removal and retention on redeveloped properties was studied over a 5 year period.
- 44% of trees were removed on redeveloped properties, 13.5% of trees were removed on non-redeveloped properties.
- A classification tree analysis explained tree removal and retention with 73.4% accuracy.
- Key explanatory variables included distance between trees and redeveloped buildings or driveways, property value, and property size.
