This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Amino acids needs of HD patients are largely undetermined
- We provide the benefits of oral supplementation in protein energy wasting in hemodialysis patients
- Attention to this area is needed
- We provide thorough background for future research
