This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Adherence with Canadian dietary guidelines can be assessed with the C-HEI 2007
- The assessment of C-HEI 2007 with the R24W and a food record are highly concordant
- C-HEI assessed with the R24W distinguish sex and age difference in diet quality
