Evaluating the primary stability of standard vs lateralised cementless femoral stems – A finite element study using a diverse patient cohort

Rami M.A. Al-Dirini, Saulo Martelli, Daniel Huff, Ju Zhang, John G. Clement, Thor Besier, Mark Taylor

PII: S0268-0033(18)30421-2
DOI: doi:[10.1016/j.clinbiomech.2018.09.002](https://doi.org/10.1016/j.clinbiomech.2018.09.002)
Reference: JCLB 4591
To appear in: *Clinical Biomechanics*
Received date: 10 May 2018
Accepted date: 3 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title: Evaluating the Primary Stability of Standard vs Lateralised Cementless Femoral Stems – A
Finite Element Study Using a Diverse Patient Cohort**

***Rami M A Al-Dirini¹, Saulo Martelli¹, Daniel Huff², Ju Zhang³, John G Clement⁴, Thor Besier³
and Mark Taylor¹**

We certify that this article is original, that it is not under consideration by another journal or been previously published. All named authors were involved in the conception of the idea, data collection, data analysis and drafting of the final manuscript. Details of the contribution of all named authors is outlined in the *Author Contribution Statement*.
