This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Kinematic differences between children with obstetric brachial plexus palsy and healthy controls while performing activities of daily living

Authors, affiliations and corresponding author's details:

Judy Mahon^{a*}, Dr Ailish Malone^{a, b}, Dr Damien Kiernan^a, Dr Dara Meldrum^b.

^a *Gait Analysis Laboratory, Central Remedial Clinic, Vernon Ave., Clontarf, Dublin 3, Ireland.*

^b *Royal College of Surgeons, 123 St Stephen's Green, Dublin 2, Ireland*

* *Corresponding author at judymahon@gmail.com*

Word Count:

Abstract: 248

Article: 4,041

Funding: This study was supported by funding from the Central Remedial Clinic Scientific and Research Trust, Ireland.

Declaration of interest: None

Conflict of interest statement: The authors report no financial or personal relationships with other people or organizations that could inappropriately influence their work

Acknowledgement: I would like to thank all participants who willingly gave of their time and without whom this study would not have been possible.
