Title: Sexual experience reduces neuronal activity in the central part of the medial preoptic nucleus in male rats during sexual behavior

Authors: Shohei Yamaguchi, Yuta Abe, Sho Maejima, Shinji Tsukahara

PII: S0304-3940(18)30582-2
DOI: <https://doi.org/10.1016/j.neulet.2018.08.037>
Reference: NSL 33772

To appear in: *Neuroscience Letters*

Received date: 22-6-2018
Revised date: 30-7-2018
Accepted date: 27-8-2018

Highlights

- c-Fos expression in the MPNc increases after ejaculation in male rats.
- c-Fos expression in non-calbindin MPNc neurons decreases with sexual experience.
- The MPNc may change functionally with sexual experience.
