Title: Supercritical CO₂ extraction of solids using aqueous ethanol as static modifier is a two-step mass transfer process

Authors: José M. del Valle, Martín Ángel, María José Cocero, Juan C. de la Fuente, Reynaldo de la Cruz

PII: S0896-8446(18)30381-4
DOI: <https://doi.org/10.1016/j.supflu.2018.08.011>
Reference: SUPFLU 4354

To appear in: *J. of Supercritical Fluids*

Received date: 8-6-2018
Revised date: 10-8-2018
Accepted date: 12-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Supercritical CO₂ extraction of solids using aqueous ethanol as static modifier is a two-step mass transfer process
