Effects of heteroatom doping on the performance of graphene in sodium-ion batteries:
A density functional theory investigation

Kimal Chandula Wasalathilake, Godwin A. Ayoko, Cheng Yan

PII: S0008-6223(18)30806-6

DOI: [10.1016/j.carbon.2018.08.071](https://doi.org/10.1016/j.carbon.2018.08.071)

Reference: CARBON 13426

To appear in: *Carbon*

Received Date: 10 July 2018

Revised Date: 24 August 2018

Accepted Date: 31 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effects of Heteroatom Doping on the Performance of Graphene in Sodium-ion Batteries: A Density Functional Theory Investigation

Kimal Chandula Wasalathilake, Godwin A. Ayoko and Cheng Yan*
