A novel DNA based bioassay toward ultrasensitive detection of Brucella using gold nanoparticles supported histidine: A new platform for the assay of bacteria in the cultured and human samples with and without polymerase chain reactions (PCR)

Mohammad Hasanzadeh, Parinaz Babaie, Ahad Mokhtarzadeh, Nader Hajizadeh, Soltanali Mahboob

PII: S0141-8130(18)33710-3
DOI: doi:[10.1016/j.ijbiomac.2018.08.092](https://doi.org/10.1016/j.ijbiomac.2018.08.092)
Reference: BIOMAC 10336

To appear in: *International Journal of Biological Macromolecules*

Received date: 19 July 2018
Revised date: 17 August 2018
Accepted date: 18 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A novel DNA based bioassay towards ultrasensitive detection of *Brucella* using gold nanoparticles supported histidine: A new platform for the assay of bacteria in the cultured and human samples with and without polymerase chain reactions (PCR)
