This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Demonstration of Infectious Transgression through the Skull Base Occurring 9 years after Pituitary Adenoma Resection

Jingyi Liu, B.A.¹, David L. Penn, M.D., M.S.¹, Ethan Katznelson, B.A.¹, Mina G. Safain, M.D.¹, Ian F. Dunn, M.D.¹, and Edward R. Laws Jr., M.D.¹

¹Department of Neurosurgery, Brigham and Women's Hospital, Harvard Medical School, Boston, MA

Running Title: Delayed Pituitary Abscess

Key words: Pituitary, Abscess, Intracranial infection, Adenoma, Bone cement

Funding/Presentations: None. A portion of this work was presented in abstract form as an oral presentation at the 2018 Meeting of the International Society of Pituitary Surgeons.
