This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: DEFEATIST AND SELF-EFFICACY BELIEFS

Highlights

- Links tested among defeatist performance and self-efficacy beliefs and negative symptoms
- There was a medium-sized, inverse correlation between the belief types
- Both beliefs correlated with negative symptoms; defeatist performance beliefs link was stronger
- These two belief types seem to be distinct but overlapping constructs
- Defeatist performance beliefs may have a greater role in negative symptoms
