This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- No approach bias toward the thin body ideal
- Faster push than pull movements towards thin and normal weight body pictures
- Relation between avoidance bias and perceived pressure to confirm to media ideals
