Title: Adsorption equilibrium models: computation of confidence regions of parameter estimates

Authors: Natália Tolazzi, Evandro Steffani, Elisa Barbosa-Coutinho, João B. Severo Júnior, José Carlos Pinto, Marcio Schwaab

PII: S0263-8762(18)30427-1
DOI: <https://doi.org/10.1016/j.cherd.2018.08.027>
Reference: ChERD 3321

To appear in:

Received date: 30-1-2018
Revised date: 22-6-2018
Accepted date: 17-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Adsorption equilibrium models: computation of confidence regions of parameter estimates

Highlights

- Determination of confidence regions for nonlinear adsorption isotherms.
- Impact of the experimental data region on parameter estimates is evaluated.
- An accurate measure of experimental variance is of fundamental importance.
- Comparison between elliptical and likelihood ratio confidence regions.
