Evolution of nano-porous structure of aluminium-magnesium alloy during multi-axial tensile deformation: Estimation of stress-strain response and dimension-less aspect ratio

Sunil Kumar

PII: S0254-0584(18)30728-4

DOI: [10.1016/j.matchemphys.2018.08.063](https://doi.org/10.1016/j.matchemphys.2018.08.063)

Reference: MAC 20906

To appear in: *Materials Chemistry and Physics*

Received Date: 29 December 2017

Accepted Date: 21 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

{For Table of content only}

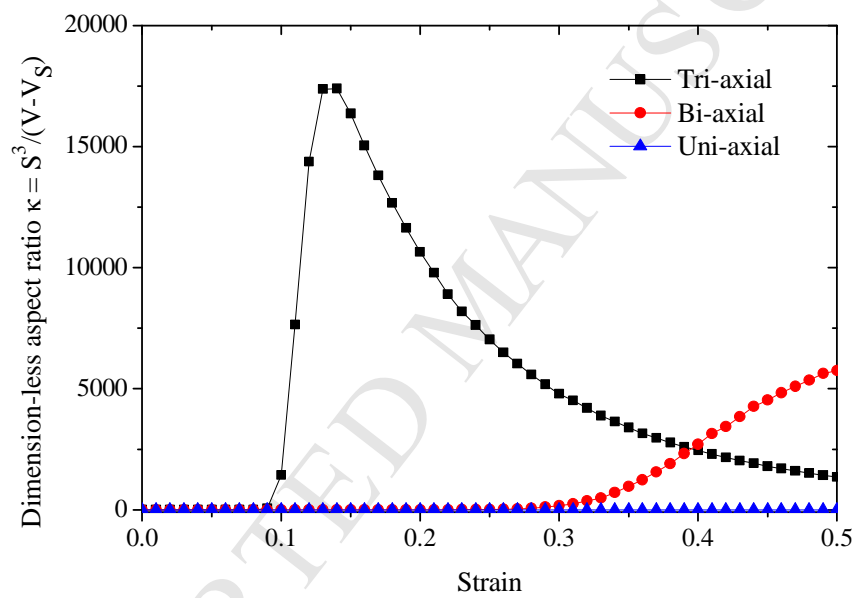

Tri-axial tensile deformation

Bi-axial tensile deformation

Uni-axial tensile deformation
