Quantitative in situ Fracture Testing of Tin Oxide Nanowires for Lithium Ion Battery Applications

Bill Song, Phillip Loya, Lulu Shen, Chao Sui, Liang He, Hua Guo, Wenhua Guo, Marco-T.F. Rodrigues, Pei Dong, Chao Wang, Xiaodong He, Pulickel M. Ajayan, Jun Lou

PII: S2211-2855(18)30618-9
DOI: <https://doi.org/10.1016/j.nanoen.2018.08.057>
Reference: NANOEN2987

To appear in: *Nano Energy*

Received date: 8 March 2018
Revised date: 9 August 2018
Accepted date: 23 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
